 Experience

Lead .NET Engineer

Urgent Courier Ltd — NZ Top 3 Logistics Provider

2010 – Present (15 years)

- Architected event-driven microservices platform on Azure
Service Bus processing 500K+ daily logistics events with 99.95%
SLA — zero critical incidents in 3 years - Migrated monolithic
.NET Framework codebase to .NET 8 microservices, reducing
cloud infrastructure costs by 35% and cutting release cycles
from 3 weeks to 2 days - Optimised SQL Server clusters handling
2M+ daily transactions via query tuning, indexing strategies and
execution plan analysis — reduced average query time by 40% -
Delivered 15+ mission-critical modules across Agile squads; led
architecture decisions, sprint planning and stakeholder demos -
Built and maintained Azure DevOps CI/CD pipelines across 8
services, cutting deployment errors by 70% and enabling daily
production deployments - Designed Clean Architecture + DDD
solutions with SOLID principles; established coding standards
adopted across the engineering team - Mentored 5 junior and
mid-level developers through code reviews, pair programming
and SOLID/secure coding workshops

 Education

Bachelor of Information Technology

2007 – 2010

Whitireia Community Polytechnic, New Zealand
