

KEVIN CHEN

SENIOR .NET ENGINEER |
C# · AZURE ·
MICROSERVICES

PROJECTS

EXPERIENCE

Lead .NET Engineer - Urgent
Courier Ltd — NZ Top 3 Logistics
Provider
2010 – Present (15 years)

- Architected event-driven microservices platform on Azure Service Bus processing 500K+ daily logistics events with 99.95% SLA — zero critical incidents in 3 years - Migrated monolithic .NET Framework codebase to .NET 8 microservices, reducing cloud infrastructure costs by 35% and cutting release cycles from 3 weeks to 2 days - Optimised SQL Server clusters handling 2M+ daily transactions via query tuning, indexing strategies and execution plan analysis — reduced average query time by 40% - Delivered 15+ mission-critical modules across Agile squads; led architecture decisions, sprint planning and stakeholder demos - Built and maintained Azure DevOps CI/CD pipelines across 8 services, cutting deployment errors by 70% and enabling daily production deployments - Designed Clean Architecture + DDD solutions with SOLID principles; established coding standards adopted across the engineering team - Mentored 5 junior and mid-level developers through code reviews, pair programming and SOLID/secure coding workshops
