

KEVIN CHEN

SENIOR .NET ENGINEER |
C# · AZURE ·
MICROSERVICES

PROJECTS

EXPERIENCE

Lead .NET Engineer - Urgent
Courier Ltd — NZ Top 3 Logistics
Provider
2010 – Present (15 years)

- Architected event-driven
microservices platform on Azure
Service Bus processing 500K+
daily logistics events with 99.95%
SLA — zero critical incidents in 3
years - Migrated monolithic .NET
Framework codebase to .NET 8
microservices, reducing cloud
infrastructure costs by 35% and
cutting release cycles from 3
weeks to 2 days - Delivered full-
stack solutions using Angular
frontend and C# ASP.NET Core
MVC backend across multiple
business-critical applications -
Managed AWS-hosted production
environments; built and
maintained GitLab CI/CD pipelines
for automated testing, build and
deployment workflows - Optimised
SQL Server clusters handling 2M+
daily transactions via query tuning,
indexing strategies and execution
plan analysis — reduced average
query time by 40% - Delivered 15+
mission-critical modules across
Agile squads; led architecture
decisions, sprint planning and
stakeholder demos - Built and
maintained Azure DevOps CI/CD
pipelines across 8 services, cutting
deployment errors by 70% and
enabling daily production
deployments - Designed Clean
