

Kevin CHEN

Senior .NET Engineer | C# · Azure ·
Microservices
Sydney, NSW (recently relocated)

["NZ citizen — full Australian work
rights, no sponsorship required",
"Available immediately for Sydney-
based hybrid or on-site roles",
"Proven in high-volume, high-
availability logistics and transaction
systems", "Strong advocate of Clean
Architecture, Domain-Driven Design
and Test-Driven Development",
"Experienced technical lead —
architecture, mentoring, Agile
delivery and stakeholder
communication"]

Experience

Lead .NET Engineer

Urgent Courier Ltd — NZ Top 3 Logistics Provider

2010 – Present (15 years)

- Architected event-driven microservices platform on Azure
Service Bus processing 500K+ daily logistics events with 99.95%
SLA — zero critical incidents in 3 years - Migrated monolithic
.NET Framework codebase to .NET 8 microservices, reducing
cloud infrastructure costs by 35% and cutting release cycles
from 3 weeks to 2 days - Delivered full-stack solutions using
Angular frontend and C# ASP.NET Core MVC backend across
multiple business-critical applications - Managed AWS-hosted
production environments; built and maintained GitLab CI/CD
pipelines for automated testing, build and deployment workflows
- Optimised SQL Server clusters handling 2M+ daily transactions
via query tuning, indexing strategies and execution plan analysis
— reduced average query time by 40% - Delivered 15+ mission-
critical modules across Agile squads; led architecture decisions,
sprint planning and stakeholder demos - Built and maintained
Azure DevOps CI/CD pipelines across 8 services, cutting
deployment errors by 70% and enabling daily production
deployments - Designed Clean Architecture + DDD solutions with
SOLID principles; established coding standards adopted across
the engineering team - Mentored 5 junior and mid-level
developers through code reviews, pair programming and
SOLID/secure coding workshops

Education

Bachelor of Information Technology

2007 – 2010

Whitireia Community Polytechnic, New Zealand

Skills
